# Manash Hada

Offensive Security | PT | Red Team

Kathmandu, Bāgmatī, Nepal

## Summary

I am a cybersecurity student focused on offensive security and hands-on experience with penetration testing and vulnerability assessment. Skilled in tools like Nmap, Metasploit, and Burp Suite, I have worked on practical projects and participated in Capture The Flag challenges. I'm learning continuously through my studies and platforms like TryHackMe, with skills in Linux, scripting, and network security. I'm eager to grow in a role where I can help identify and fix security weaknesses to keep systems safe.

---

## Experience

GURU Institute of Engineering and Technology

Instructor

January 2026 - Present (4 months)

Flagforge

11 months

Frontend Developer

August 2025 - Present (9 months)

Back End Development

June 2025 - September 2025 (4 months)

New Baneshwor, Kathmandu

Developed a backend application using Node.js, Express, & MongoDB to build a scalable and efficient API for managing FlagForge. Implemented RESTful endpoints to handle CRUD operations, integrated authentication and authorization features, and ensured data validation and error handling for reliability.

PGS Software Club

Teaching Assistant

December 2025 - February 2026 (3 months)

## Education
